

SHORE TRENCH®

TRENCH SUPPORT SYSTEMS

INNOVATIVE TRENCH SUPPORT SOLUTIONS

GROUND BREAKING INNOVATION

Our unique **ShoreTrench™** technology has been in development for over three years, from concept to production. **Designed to make your operations safer and more efficient.** Ready to deploy and fast to remove, our system not only reduces your dig time but maximises your site efficiency, **saving your business both time and money.**

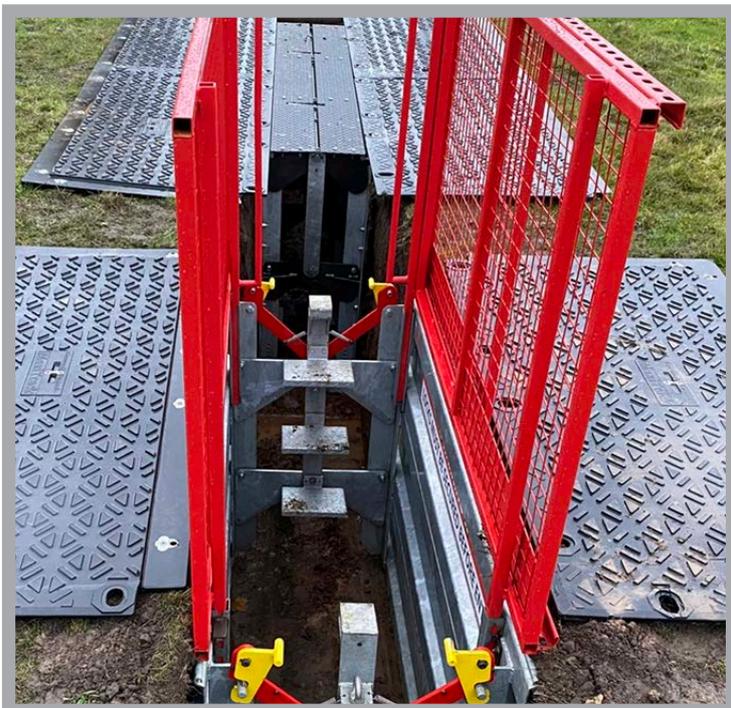

PATS

Personnel Access Trench Support

Tailor-made for the laying of pipes and cables

- » Ready to deploy
- » Tailored to the bucket width
- » Triple lock safety system back-up
- » Utility installation – no pipe or cable pinching
- » Internal solid steps
- » In line sequence - FACTORY TO FIELD PRODUCTIVITY
- » Protects trench integrity – no over digging required
- » Gated guard rail access
- » Rapid insertion and extraction
- » Carriage cradle for ease of logistics

Drive Over Trench Support

Tailor-made for a variety of site usage where vehicular trench crossings are required

- » A unique industry first
- » Tailored to the bucket width
- » Ready to deploy
- » Speedy extraction
- » Interlocking mechanism
- » Plant and vehicles can cross with ease
- » Eliminates temporary fill
- » Adjustable feet for varying depths
- » Bolt lock mechanism for ground mat approach
- » Protects trench integrity – no over digging required
- » Carriage cradle for lifting beam, mats and bolts
- » Utility installation without compromise

FUTS

Foundation Unit Trench Support

Tailor-made for the house building industry providing the following benefits:

- » Ready to deploy
- » Tailored to the bucket width
- » Supports trench excavation with end shutterboard
- » Available in a variety of dimensions
- » Supports trench pre-concreting
- » Used in sequence for wall foundations
- » No need for personnel access
- » Safe and speedy removal
- » Totally recyclable
- » Protects trench integrity – no over digging required

Optional attachments

Magnetic LED lights

Lifting bar and chains

Ground mats

Guard rails

Shutter boards

Core Benefits

- Health & Safety patent protected “Triple lock system” and Molyplate™, providing the **ultimate solution in workforce protection** from trench collapse.
- **Significant CO2 reductions** helping the construction industry in its bid to reach **net zero** by 2050.
- **Time & Cost efficiencies** – Deployed and ready to use within **3 minutes**.
- Designed, tested and **made in Britain from British components** to BS EN 13331 : 2002, Parts 1 and 2 trench lining systems and BS 5975 [2008].
- **Continuous Innovation** and ongoing **Research and Development** to support all trench shoring requirements for our future product ranges and clients’ needs.
